

# Premier Display Instructions (KS-DIS)

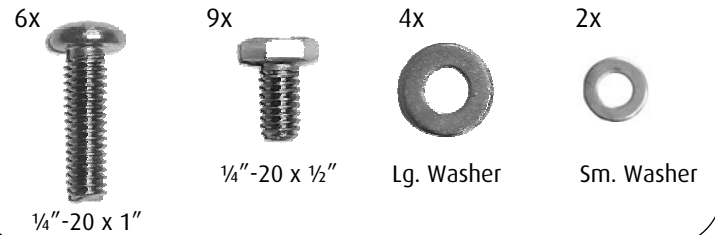

## Assembly Instructions

Thank you for purchasing a Gaines Manufacturing Showroom Display. The Gaines Premier Display stylishly showcases available Gaines products. With regular care, your new display will provide many seasons of sales. If you have any general questions about the display, if you need any assistance during assembly, or if you require additional sales assistance, please phone us directly at (858) 486-7100 or visit our dealer area at [www.gainesmfg.com](http://www.gainesmfg.com).

### Tools needed:

### Hardware: (Not to scale)

### 1 Display Base Preparation

Determine where your display will be located. The base can be heavy once the products are mounted to it so it is recommended to place the base in the location you intend to show the display. Position the base so that the two small welded u-brackets are in front on the left side.

### 2 Keystone Deluxe Post, Decorative Post Cuff, and Mailbox

- Locate the Keystone Deluxe Post parts and Decorative Post Cuff. Assemble the main post, cross beam, end cap, and curved brace according to instructions included with the Deluxe Post. Do not attach mailbox yet.
- Fit the Decorative Post Cuff onto the bottom end of the Deluxe Post according to the instructions included with the Post Cuff.
- Slide the bottom of the assembled Deluxe Post over the large welded u-bracket on the display base with the mailbox support arm pointing to the right (see photo). Tightly secure the post using four 1/4"x20x1/2" hex-head bolts and four large washers provided.
- Once your Deluxe Post is secured, attach the Keystone Mailbox to the cross beam and the address plaque to the curved brace as per instructions included with post.

### 3 Classic Mailbox

- Locate the Classic Mailbox and Classic Pedestal and assemble according to instructions included with the Classic Mailbox. The address plaque has been installed at the factory for your convenience.
- Position the assembled Classic Mailbox and pedestal on the display base by aligning the four pedestal base holes with the four holes on the display base. Secure the pedestal using four 1/4"-20x1 Phillips head bolts provided.

#### 4 Wallmount Mailbox and Display Stand

- A. Locate the Wallmount display stand. Align the three holes at the bottom of the display stand with the three holes on the display base and secure with three  $\frac{1}{4}$ "x20x $\frac{1}{2}$ " hex-head bolts provided.
- B. Install two  $\frac{1}{4}$ "-20x1 Phillips head bolts on the Wallmount display stand leaving  $\frac{3}{4}$ " of thread exposed.
- C. Hang and level the Wallmount Mailbox on bolts and tighten bolts securely.

#### 5 HouseMark Plaque and Posts

- A. Locate the HouseMark Plaque and Post Assembly. The plaque has already been attached to the posts for your convenience. Slide the posts over the small u-brackets on the display base with the plaque facing toward you.
- B. Install a  $\frac{1}{4}$ "x20x $\frac{1}{2}$ " hex-head bolt and small washer in the hole on the rear of each HouseMark post and tighten to secure the post from moving.

#### 6 Care and Cleaning

All Gaines products leave the factory with a very light surface protectant. You can assimilate this coating by applying WD-40 to the display products using a soft cloth. The WD-40 will aid in removing fingerprints, smudges, dust, dirt, or other residue and will leave the surface with a beautiful, glossy appearance. Regular cleaning will provide years of service and help to achieve maximum customer attraction.

Congratulations. You have successfully completed the assembly of your Gaines Premier Display. You will enjoy many years of service from this product.

Actual product colors and finishes may vary from photo.

#### **MERCHANDISING TIP!**

If overhead spot lighting is available, arrange the lights to give the brass accents maximum light reflection. Your customers will stop dead in their tracks!
